1. Mineral reserves are inclusive mineral resources
2. Gold equivalent ounces have been estimated using \$1,000 per ounce gold and \$16 per ounce silver and have taken into account relative metallurgical recoveries.
3. IMZ Total % interest is calculated from gold equivalent ounces
4. Please read in conjunction with IMZ's NI 43-101 reports and news releases for a discussion of assumptions, parameters and for the Qualified Persons responsible for each estimate.
5. Estimated mineral resources are not mineral reserves and do not have demonstrated economic viability.
6. The technical information provided here was reviewed by IMZ's Qualified Person, VP Corporate Development Nick Appleyard.
7. Silver-Gold ratios in Totals are back-calculated from summed gold equivalent ounces for each individual project and shown for reference only.
